

Leading the Way, Leading the World

India to Become Pharmacy of the World

PM Modi undertook a 3-city tour to conduct an extensive review of the vaccine development and manufacturing process. He visited the Zydus Biotech Park in Ahmedabad, Bharat Biotech in Hyderabad and Serum Institute of India in Pune.

Two of these sites are where India is indigenously developing vaccines to fight COVID and one of these sites is where crores of vaccines to save the world will be manufactured.

He told the scientists that he chose to meet them face to face in order to boost their morale & help accelerate their efforts at this critical juncture in the vaccine development journey.

PM Modi stressed that India considers vaccines as not only vital to good health but also as a global good, and it is India's duty to assist other countries, including the nations in our neighbourhood, in the collective fight against the virus.

India is not only leading the world in research for vaccines but will also be crucial for the world's vaccine production.

Next month, ambassadors of 100 countries are scheduled to visit Pune on December 4, they will visit Serum Institute of India and Gennova Biopharmaceuticals Limited.

India has become the Pharmacy of the World in its fight against the pandemic.
